

Amendment 0001 to BAA #06-015
“Large Tactical Sensor Networks”

1. The purpose of Amendment 0001 is to revise Section II and III as follows:

II. AWARD INFORMATION

Award Information is as follows:

- Total Amount of Funding Available: \$25M is available in FY07. ONR plans to issue an annual BAA for this program. The total funding for the program is anticipated to be \$84M during FY07-FY11.
- Anticipated Number of Awards: 5-15
- Average Award Range: There is no set award limit. \$600K to \$1.25M is an estimate of the average total award. Proposals of higher and lower amounts will also be considered.
- Proposed work should be structured for a one to three year period. Multiple-year proposals shall include a base performance period of twelve months with one or two 12-month options.

Proposals that build on current or previous DoD work are encouraged. Offerors enhancing work performed under other ONR or DoD projects must clearly identify the point of departure, what existing work will be brought forward, and what new work will be performed under this BAA.

III. ELIGIBILITY INFORMATION

This solicitation is open to all responsible sources.

Historically Black Colleges and Universities (HBCU) and Minority Institutions (MI) are encouraged to submit proposals and join others in submitting proposals. However, no portion of this BAA will be set aside for HBCU and MI participation due to the impracticality of reserving discrete or severable areas of FORCEnet Science and Technology for exclusive competition among these entities. Independent organizations and teams are encouraged to submit proposals in any or all areas. However, offerors must be willing to cooperate and exchange software, data and other information in an integrated program with other contractors, as well as with system integrators selected by ONR.

ALL OTHER REQUIREMENTS REMAIN UNCHANGED.
